SUMMARY

Final-year Software Engineering student at Shahjalal University of Science and Technology (SUST) with a **3.91 / 4.00 CGPA**, **Codeforces Expert** rating of 1715, and 2000+ problems solved across competitive programming platforms. Experienced in **backend and full-stack development** using Node.js, Express.js, Go, React, Next.js, and relational and NoSQL databases.

EDUCATION

B.Sc. in Software Engineering 2023 - 2027 (Expected)
Shahjalal University of Science and Technology (SUST), Sylhet *CGPA: **3.91 / 4.00** (up to 6th Semester)*

- Maintained a **4.00 / 4.00 GPA across all major Software Engineering courses** completed to date, including *Artificial Intelligence, Machine Learning, Database Management Systems, Algorithm Design & Analysis, Object-Oriented Programming, Data Structures, Software Architecture & Design Patterns, Computer Networks, Operating Systems & System Programming,* and *Theory of Computation*, among others.

COMPETITIVE PROGRAMMING

- **Codeforces:** Expert - Max Rating 1715 | Handle: *darkEye*
- **CodeChef:** 4-Star - Max Rating 1956 | Handle: *voideye*
- **Solved 2000+ problems** across Codeforces, VJudge, CodeChef, AtCoder, LeetCode, and CSES
- Participated in **SUST IUPC twice**, along with Inter-University Programming Contests hosted by **KUET, CUET, UIU, AUST, and UU**.

TECHNICAL SKILLS

Languages: C++, Python, Java, JavaScript, Go (Golang), SQL

Frameworks and Libraries: React, Next.js, Node.js, Express.js, FastAPI, TensorFlow

Databases: MySQL, PostgreSQL, MongoDB, Redis

Tools and Platforms: Git, Docker, Linux, Postman, Nginx, Kaggle, Google Colab

Core Concepts and Principles: Data Structures and Algorithms, Object-Oriented Design (OOP), SOLID Principles, KISS Principle, REST APIs, System Design Fundamentals

Also Explored: C#, Unity, Kotlin (Android), LibGDX, SDL2 (game dev)

PROJECTS

SustCafeteria React, Node.js, Express.js, MySQL, Docker | *Live Demo*

- Developed a full-stack cafeteria management system for SUST, implementing JWT authentication and role-based authorization for Admin and Staff across menu, inventory, attendance, and order management.
- Developed a modular REST API in Express.js secured with bcrypt password hashing and documented via Swagger UI.
- Containerized the app with Docker and deployed it behind Nginx load balancing across replicated backend instances, with the frontend on Vercel, backend on Render, and a TiDB Cloud MySQL-compatible database.

Plan2Go React, Go, MySQL, Gemini API | *Live Demo*

- Built an AI-assisted travel planner that generates personalized itineraries from user preferences and budget.
- Engineered the Go backend and MySQL schema for itinerary generation, place recommendation, and trip history.

TransactionManager Android (Kotlin/Java), Firebase, MPAndroidChart | *Release APK*

- Built an Android finance tracker using Firebase Authentication and Firestore for secure, synced data.
- Added MPAndroidChart visualizations, budget tracking, PDF report exports, and shared collaborator access.

JungleRush Java, LibGDX, MongoDB, Gradle | *Desktop Release*

- Built a lane-based endless-runner desktop game in Java and LibGDX, featuring real-time collision detection, particle effects, dynamic difficulty scaling, and a full menu/pause/game-over UI.
- Implemented a MongoDB Atlas-backed global leaderboard for top scores with automatic offline fallback to local storage, and shipped cross-platform native builds for Windows, macOS, and Linux via Gradle.

ACHIEVEMENTS

- **ICPC Asia-West Continent Finalist, 2025** - Top 20 Bangladeshi teams
- **ICPC Dhaka Regionalist, 2025**
- **DUET Datathon** - Finalist, 9th Place
- **PSTU National Hackathon** - Finalist
